**Subject:** FW: in stream water quality values  
**Attachments:** EPA Approach to EMDF Risk-based Instream Water Quality Values for Radionuclides 10-15-2021 Rev 1.docx

As you know, DOE provided EPA and TDEC with a proposed option for determining risk-based instream water quality values but we do not think it is acceptable to meet the Administrator's Decision on the dispute. The attachment is what Region 4 SEMD would like provide DOE as a resolution to the issue. We know DOE will not like it, but we do think it meets the requirements of the Administrator's Decision on the dispute. Please feel free to reach out to Cathy and I with any questions, thoughts or comments. We have sent this to our HQ and will meet with them early next week. I'd like to be able to tell them that TDEC is in agreement with our counter proposal, so please let us know what you think about this.

The attachment summarizes the counter proposal to DOE in the first page and then includes some additional information that will hopefully provide enough detail into what we have been working on for the past number of months to inform our response to DOE's proposal.

Thanks,  
Glenn
